WORK EXPERIENCE

Software Developer AeonX Digital Solutions

08/2023 - Present

Achievements/Tasks

- In my role at AeonX, I am responsible for the development of frontendportal UI that included an admin panel and a landing page. Additionally, I implemented DevOps practices by setting up automated CI/CD pipelines using AWS services, ensuring seamless and efficient deployment processes.

React Developer Arkay Apps

01/2023 - 08/2023

8 Month

Achievements/Tasks

- Developed and maintained innovative web applications that enhanced user experiences. Collaborated with a multidisciplinary team to deliver robust frontend solutions. Contributed to the company's success by meeting client needs and surpassing project goals.

Internship Warble Solutions

09/2022 - 12/2022

PROJECTS

OTP working in Python (04/2021 - 07/2021)

- I did this project to understand the basic working of OTP.
- Java and its libraries were used in this project
- Project link : https://github.com/itssebastianvannier/Otp_in_python

Food Order App(Taste It) (09/2022 - 11/2022)

- I have created a app in java in android studio , to enhance my app development in java.
